Offer not valid in conjunction with other promotional offers

## 1

### Orthopantomograph®

The OC200 D incorporates the latest technological advances to help reduce X-ray exposure to the patient while improving the diagnostic image quality and treatment planning capabilities of the system.

- ✓ Patented V-shaped X-ray beam provides better imaging of the maxillofacial area
- ✓ Automatic Exposure Control (AEC) ensures optimal diagnostic quality
- ✓ Patient positioning animations specific to each imaging program demonstrate the proper patient positioning procedure
- ✓ Automatic Facial Contour (AFC) on the OC200 D lateral cephs enhances soft tissue visibility

## 2

### Focus™ X-ray

Focus™ X-ray is extremely stable yet amazingly light and easy to handle.

- ✓ Anti-Drift Mechanism (ADM) means that the movement stops when you want it too.
- ✓ Three different reach arms (69", 75" or 85") ensures optimal placement and useability
- ✓ High frequency DC generator ensures compatibility with today's high digital sensors
